PROTECT MARBLE-P

Food contact certificate

Useo professionale
Professional usage

Trattamento base solvente antiacido con **finitura lucida** per manufatti a base calcio. Studiato per applicatori (trattatori, levigatori). Kit composto da prodotti ed accessori per la detergenza pre-trattamento e prodotto antiacido con accessori per l'applicazione. Crea un film invisibile separando così la superficie dal contatto diretto con gli agenti sia acidi che macchianti impedendo alla pietra di assorbire qualsiasi sostanza.

Acid-proof solvent based treatment with **a polished finish** for calcium-based artefacts. It is designed for professionals such as applicators, treaters, sanders. The kit consists of pre-treatment cleaning products and accessories and an anti-acid product with application accessories. It creates an invisible film separating the surface from direct contact with both acidic and staining agents, thus preventing the stone from absorbing any substances.
